SALESLENS ENTERPRISE BI PLATFORM • ACADEMIC DELIVERABLE DOC-06

Risk Management, RMMM, Issue Log & Project Closure

Course: B.Tech CSE Semester III • Software Engineering & Project Management • Version 1.0

1. Risk Register & Exposure Matrix ($RE = P imes I$)

ID	Risk Description	Prob (1-5)	Imp (1-5)	Exposure	Rank	Mitigation Strategy	Owner
R1	14% Missing Region Data Cleaning Complexity	4	5	20	RANK 1 (CRITICAL)	4-tier waterfall rule engine	BI Dev + Analyst
R2	Annual Sales Conference 8-Week Deadline	4	5	20	RANK 2 (CRITICAL)	Strict 9-view scope cut (saves 51 PD)	Project Manager
R3	Analyst Fear of Replacement / Resistance	4	4	16	RANK 3 (HIGH)	Upskill to Data Quality Governors	Sales Director
R4	Legacy Billing System Schema Inconsistency	3	4	12	RANK 4	Read-only overnight ETL staging table	IT Admin
R5	Scope Creep from Regional Managers	3	4	12	RANK 5	Formal change control & Phase 2 backlog	Project Manager
R6	Performance Bottleneck on Large Queries	2	4	8	RANK 6	Pre-aggregated materialized views & Redis	BI Developer
R7	Single Point of Failure (1 BI Developer)	2	4	8	RANK 7	Clean modular code, standard docs, PRs	Tech Lead

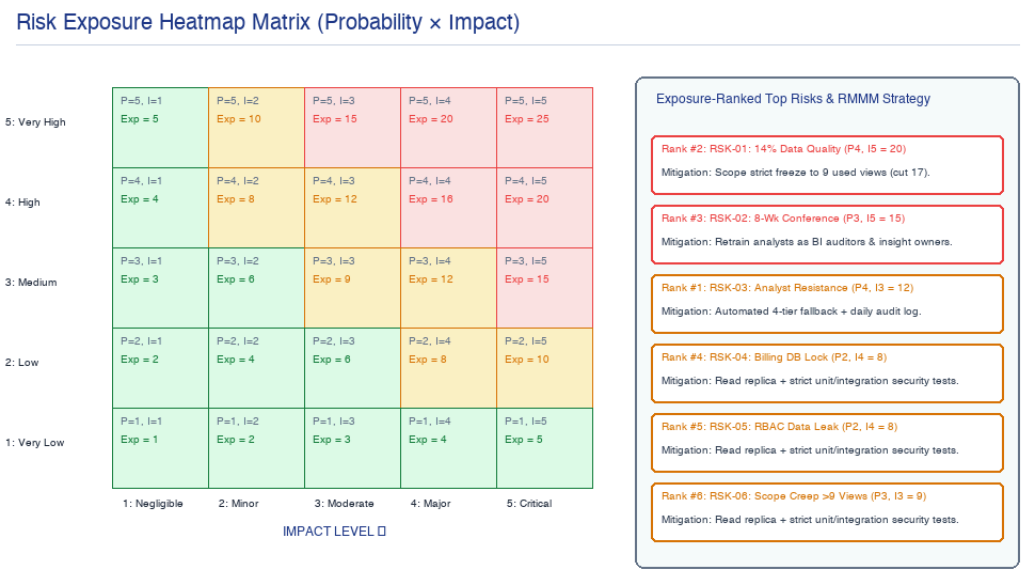

Figure 6.1: Risk Exposure Heatmap prioritizing R1 (Data Cleaning), R2 (Deadline) and R3 (Stakeholder Fear)

2. RMMM Plans for Top 3 Critical Project Risks

Risk 1: 14% Missing Region Data Cleaning Complexity ($RE = 20$)

Mitigation: Formulate 4-tier resolution rules in Week 1 with senior analyst; automate confidence scoring for every transaction.

Monitoring: Track daily percentage of unassigned records. If unassigned > 1.0%, trigger immediate postal directory audit.

Management (Contingency): Route remaining ambiguous records to an explicit 'Unassigned-Audit View' on dashboard.

Risk 2: Annual Sales Conference 8-Week Deadline ($RE = 20$)

Mitigation: Prune 26 legacy reports down to 9 high-value operational views, saving 51 person-days (2.67-week buffer).

Monitoring: Weekly tracking of Schedule Performance Index (SPI). If $SPI < 0.90$, initiate fast-tracking.

Management (Contingency): Deploy Phase 1 with top 6 views for conference stage if ETL issues arise.

Risk 3: Analyst Fear of Replacement ($RE = 16$)

Mitigation: Reposition analysts as Data Quality Governors and Anomaly Auditors, eliminating exhausting manual PDF prep.

Management: Co-present View 9 (Data Quality Console) with the analyst at the Annual Sales Conference.

3. Historical Issue Log & Lessons Learned

Issue ID	Historical Problem	Root Cause	Closure Status
`ISS-01`	Conflicting weekly numbers across regions	Subjective manual Excel formulas	RESOLVED: AUTOMATED ETL SINGLE SOURCE
`ISS-02`	Weekend analyst burnout preparing 40p PDFs	16+ hrs manual copy-pasting	RESOLVED: AUTOMATED LIVE DASHBOARD
`ISS-03`	14% billing lines lack region codes	Legacy UI lacked mandatory dropdown	RESOLVED: 4-TIER RESOLUTION TABLE

Key Success Factors & Phase 2 Roadmap

Success Factors: Scope pruning (saving 56% time), deterministic data cleaning rules, and proactive stakeholder inclusion.

Phase 2 Roadmap: Automated push email digests (FR-10), predictive ML demand forecasting, and iOS/Android mobile apps.
